

PRODUCTIVE --- PARKS

Changing the Game for Parks and Recreation Maintenance Management

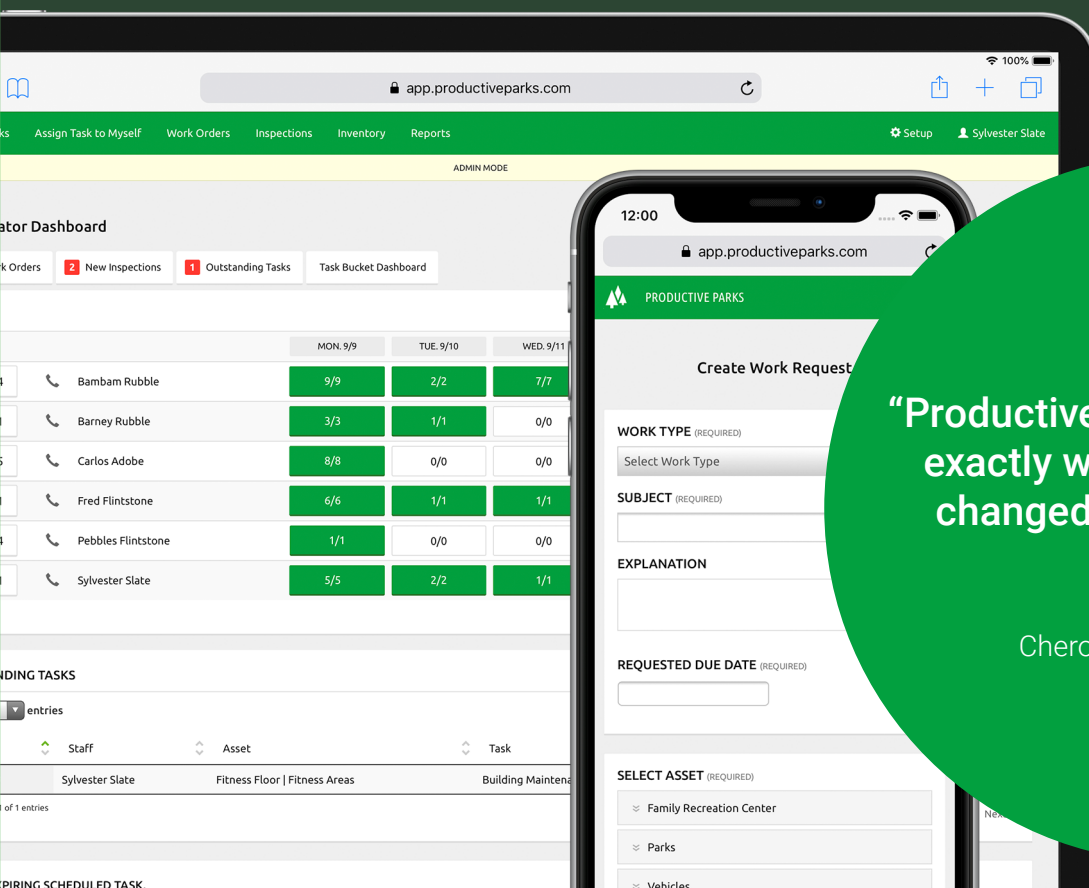

An aerial photograph of a rectangular soccer field with green artificial turf. White lines mark the field boundaries, including the center circle and the two goal areas. Two soccer goals are positioned at the top and bottom center of the field. The field is enclosed by a green safety fence. Surrounding the field is a concrete sidewalk, and further out are lush green trees and grass. A large, dark gray circular overlay is centered on the field, containing white text.

The only maintenance
management software
built by parks and recreation
professionals, for parks and
recreation professionals.

Discover the benefits of being more productive.

Productive Parks gives you a centralized hub where teams can easily communicate task-related information. When teams are on the same page and information gets communicated clearly and efficiently, the entire culture of an agency starts to shift. Productive Parks helps Parks & Recreation agencies have:

- Safer, better-maintained parks, equipment, vehicles and facilities
- Quick access to critical documents and work orders
- Systems in place for more efficient workflow and task management
- Opportunities to notice and address minor issues before they become big problems
- Insights to make informed decisions about budgeting, replacement costs, and assets
- Stored inspection reports available for risk management and compliance checks

"Productive Parks was definitely exactly what I needed, and it changed the game for me."

Kim Whatley
Cherokee County, Georgia

Why Productive Parks?

SOFTWARE BUILT BY PARKS & RECREATION PROFESSIONALS
FOR PARKS & RECREATION PROFESSIONALS

Productive Parks is software designed around the needs of parks & rec agencies. We created software that we and our colleagues wished was available for recreation professionals.

Our team has decades of combined experience working in the parks & recreation field – from maintenance to director-level positions. In the field and in board meetings, we saw the impact and potential of maintenance software. But we also saw how available software didn't address all the dynamic needs of parks & recreation settings.

**"We're more organized
with daily assignments and
staff accountability which allows
us to be more productive!"**

Ryan V.
Tinley Park District, IL

Productive Solutions

Cloud-Based

Runs on any smart device--no downloads required.

Scheduling Simplified

Optimizing task management that makes sense to your team.

Automated Work Orders

When an inspection deficiency is noted, a work order automatically is generated.

Modifiable Task & Work Order Management

Easily schedule, track, and generate reports by asset, staff, or category.

Generate Custom Reports

Gather and present relevant information using our Report Engine.

Get Insights About Assets

Know when it's time to replace equipment or assets and how to budget for it.

Make Decisions Based on Data

Managers get a clear picture of labor hours, expenditures, and inventory via our intuitive administrator dashboard.

Lifetime Support

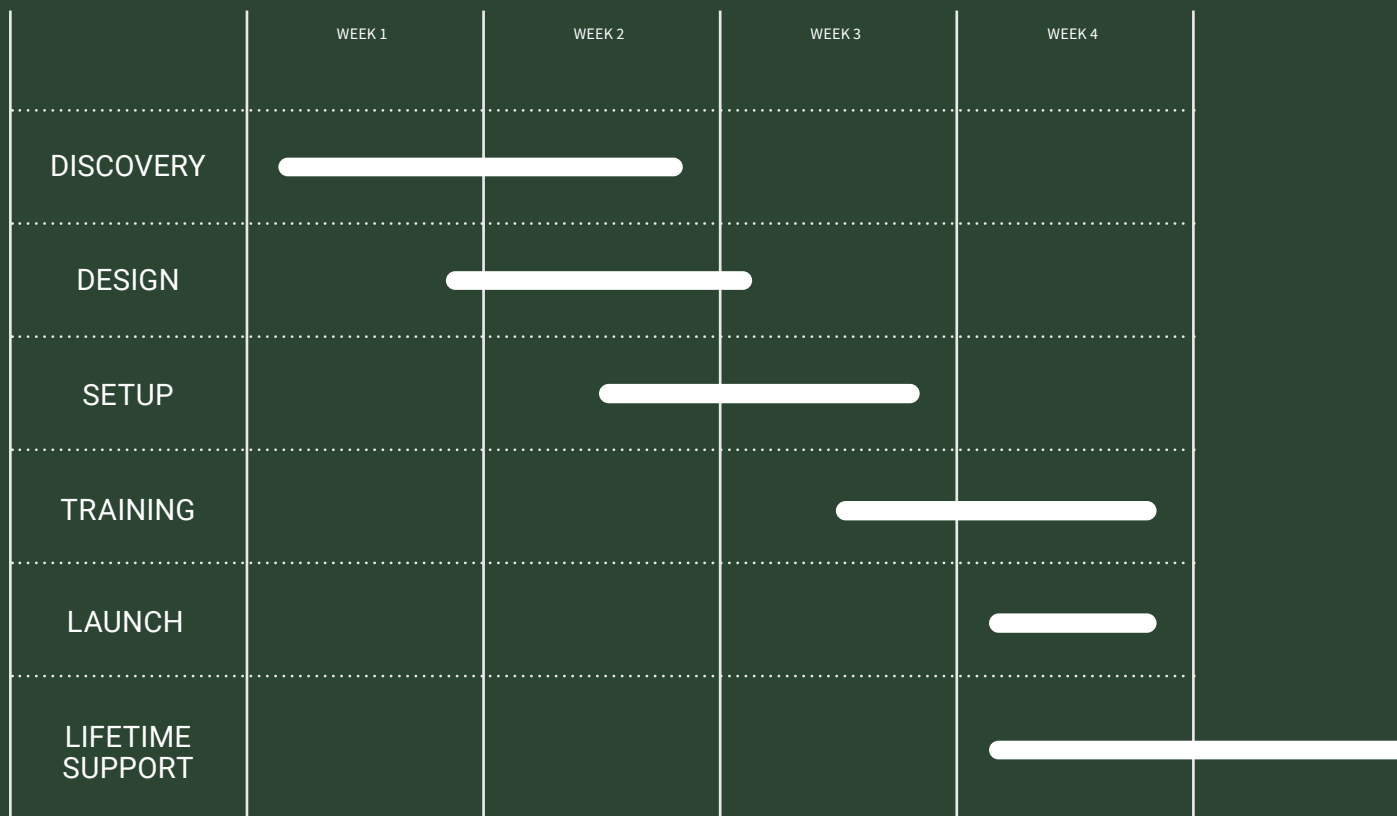

Get support from our team as long as you use Productive Parks.

Implementing Your Agency's Vision with Productive Parks

START BENEFITING IN WEEKS

Productive Parks software is tailored to the specific maintenance needs of your agency. The time frame of successful implementation depends on factors like the size and structure of your agency. Typically, we can get a team confidently ready to use their customized version of Productive Parks in under 8 weeks.

Your team is supported through the entire process. We train your staff on how to use the software so they can take advantage of its capabilities. We also provide lifetime support, so your team is never left wondering what to do next if something changes in your agency.
